

KITTIKORN KEERATIKRIENGKRAI 6188086

This one is a page that already have it I use a theme readthedoc the nav bar will be the left hand side and get a black one and the site name is a China Nongnam

This one is a syntax page I download it and set the navbar to correct path of file .md and I set the icon of website to my image so It so cute!

## HELLO! I'm China I'm second year student
Ln 2, Col 6 Spaces: 8 UTF-8 CRLF Markdown Prettier
```

This one is a page china555 page this one I make it from # it represent a bigger size and ** bold

And I create underline to separate the content and I use picture to show a black panther that very cute so much!! And Have a ## it similar to h2 in html tag if you check me see the cute picture!!!. cheer!!!
